

Recombinant collagenase

NP-Collagenase

**Ideal for collecting cells and organoids after culture with MatriMix.
(It can be used for passaging cell aggregates.)**

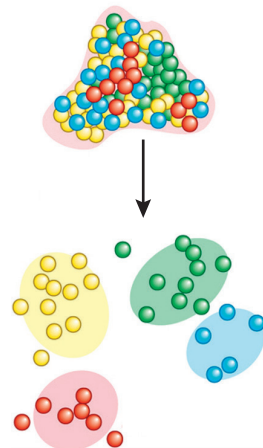

NP-Collagenase is a recombinant collagenase produced using the *Brevibacillus* expression system; it is a highly purified and stable enzyme.

It also has low endotoxin (≤ 10 EU/mg) and is free of animal-derived components.

Organism of origin: *Grimontia hollisae*

Recombinant production in: *Brevibacillus choshinensis*

Japan Patent No. 6661072

Code	Product name	Size
899 001	MatriMix (511)	1 kit
899 031	MatriMix for PDX*	1 mLx5 pcs.
892 461	NP-Collagenase (20 μ g/ μ L)	500 μ L
